Subject: RE: Conference call to discuss coordinated approach moving forward for PFAS sites

Sorry for the delay Ralph.

I'll follow up with our drinking water staff to get this scheduled.

Your offer of assistance is much appreciated!

Steve

Steve,

We are still hoping to hear back from you regarding Jeff's message from last week. Please let us know what might work for you.

Subject: Conference call to discuss coordinated approach moving forward for PFAS sites

Steve,

Several weeks ago we discussed holding a call to begin discussing potential future actions on PFAS sites that may arise from current MPART lead sampling activities.

We decided to wait while you all were heavily involved on daily items with regards to Parchment, but wanted to reach out and see if now was an appropriate time to hold the kickoff meeting for that discussion.

Tom Poy is out this week, but Ralph and I thought maybe next week, Wednesday or Thursday, may work to start the discussion.

As a reminder we were going to:

1. Start discussing what assistance MPART/DEQ may ask of EPA for future events; technical advice, sampling assistance, Command Structure for response, and other items.
2. Discuss if multiple events at one time may affect the questions in 1. Above
3. You were going to summarize the municipal water sampling across the State that is ongoing and brief us up on that

I am sure there may be other topics but I think these were the ones to start with.

Please let us know your availability to kick this off, and thank you.

Thank you,

Jeff Kimble, EPA OSC
